

New Features Overview

September 2016

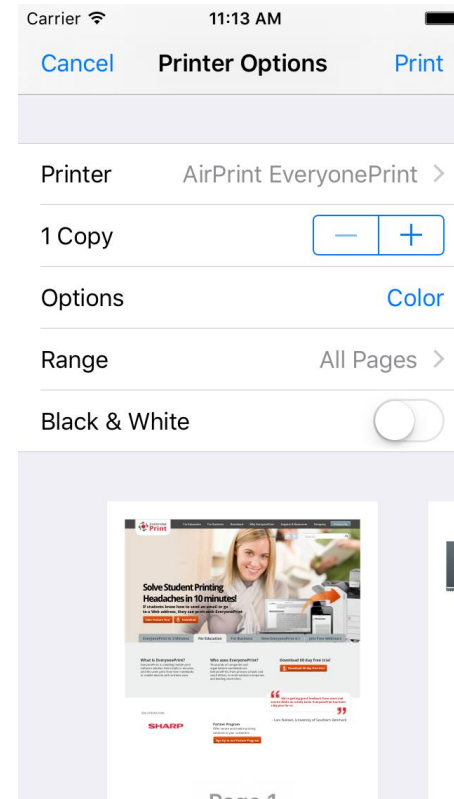

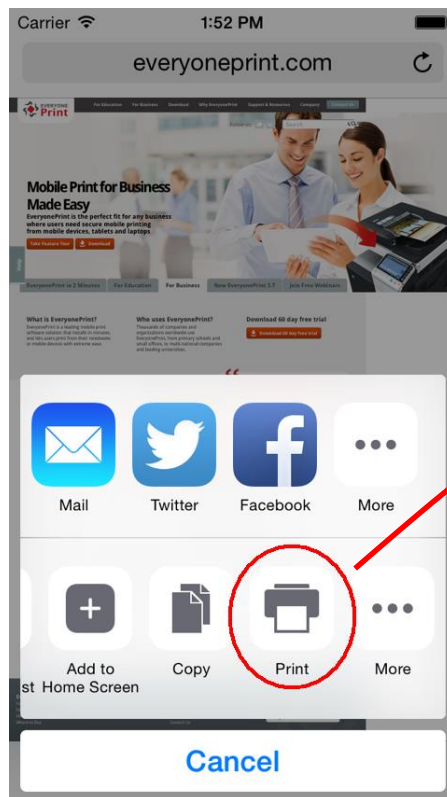

EveryonePrint 4.2

- Support for printing options with native Apple iOS AirPrint
- New Android Print plugin printing capability for Android 5+
- Experimental support for Microsoft Office 365 hosted Exchange and ADFS authentication
- Added User print activity report
- Added experimental support of rendering of HTML emails with inline images

.. And many more smaller features and improvements!

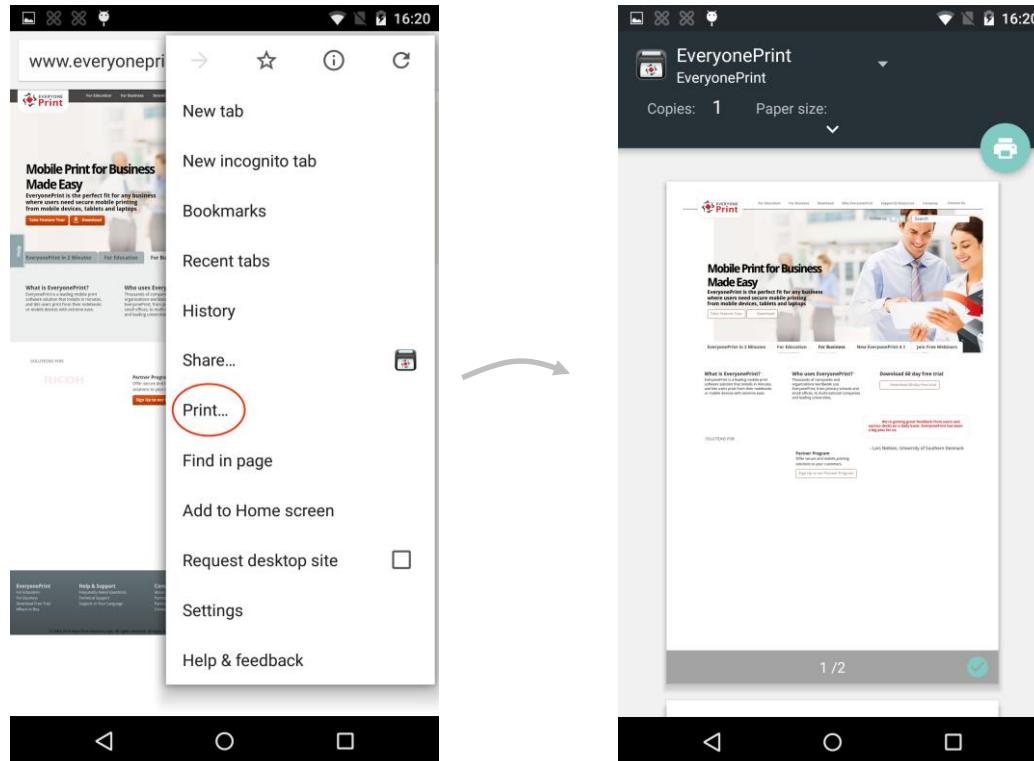

Support for printing options with native Apple iOS AirPrint

- Whether you're using Bonjour AirPrint, Wide Area Mobile Print or the MDM AirPrint feature, you can now choose number of copies, page range and color/bw from AirPrint dialogs

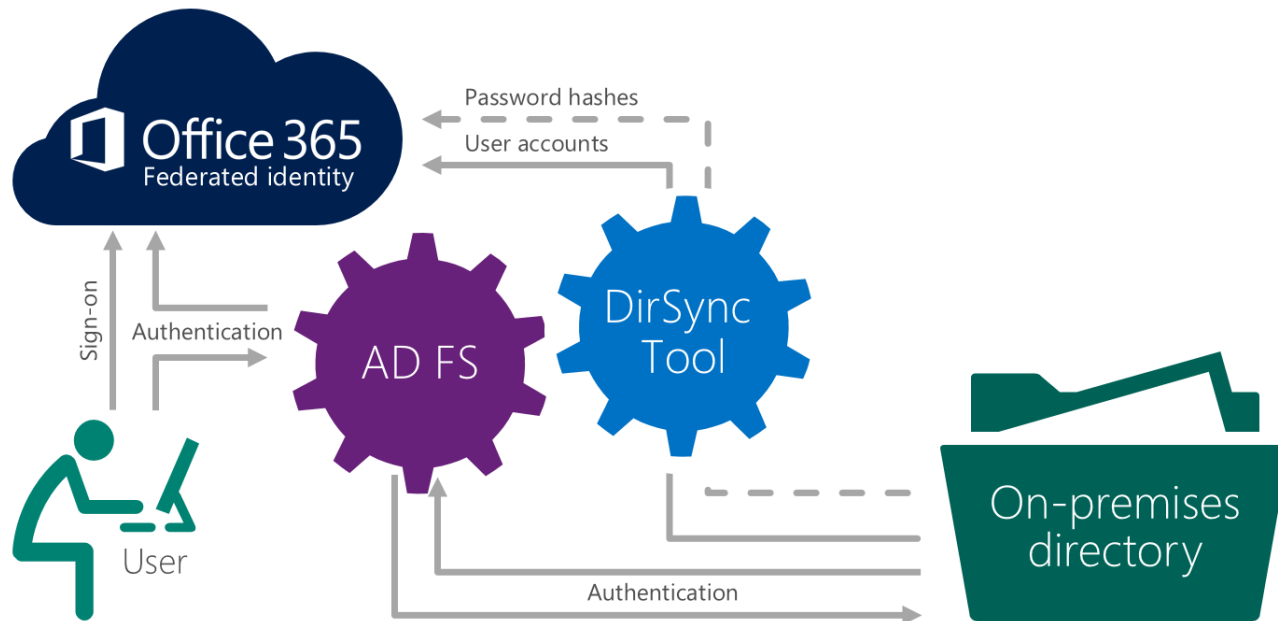

New Android Print plugin printing capability for Android 5+

- Use the printing system built into Android 5+ for much more intuitive printing experience for users. Just click "Print" to print on Android 5+ devices.

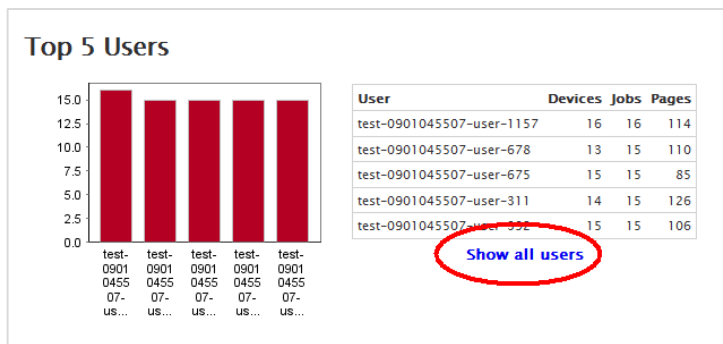

Experimental support for Microsoft Office 365 hosted Exchange and ADFS authentication

- For Email Print feature we have added experimental support for customers using hosted Microsoft Office 365 Exchange with AD FS single-sign-on authentication.

User print activity report

- Now possible from the Dashboard, to view simple print activity report by user, with drill down to a users history for selected period

Dashboard Monitor Users Devices Settings

Print Activity

From 1/8/2016 to 1/9/2016 apply

Print Activity August 1, 2016 – September 1, 2016
